ABOUT LITE TECHNOLOGY

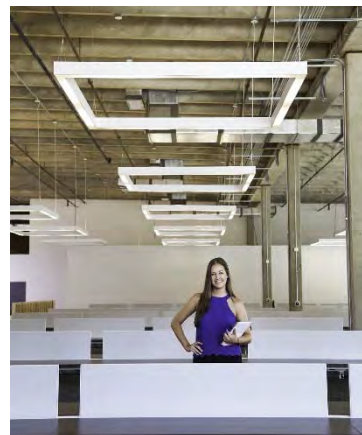

OUR Factory

Our factory boasts the latest in computerized technology, from lasers, robots and 3D printers to large programmable brakes and presses to provide exceptional quality and fast turnaround all to your exacting specification. Our factory flexibility allows us to design to your exact specification application. Our in-house powder coat finishing provides cost effective options for every product.

OUR Products

The right LED fixture today requires the right wattage and lumen package, the right reflectors and diffusers to maximize efficiency, the right size and finish for the perfect look for your application, and the right warranty to maximize maintenance. We can achieve all of this for you with fast turnaround, value pricing, and continuing customer care.

*Consult for Products Made in USA.

OUR YesWeCanCulture

Our founder's philosophy is to say "yes" and then work hard to make it happen!

This is a stark contrast from the slow moving, bureaucratic approach of our larger competitors. We ensure that every lighting challenge is met with determination and a smile; and we are committed to being your solution!

NOTE to our Valued Customers:

As the current climate of tariff policies continues to impact pricing, LITE can be a great resource to help minimize the impact on your purchases. Manufacturing domestically, we have the fixture advantage.

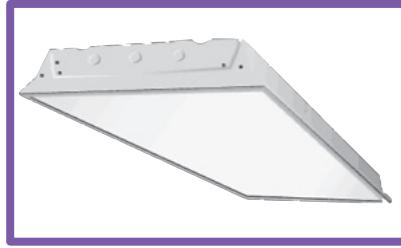

We can also recommend or source alternative products that might be more cost effective. Please check with your sales consultant for options and current pricing.

Our SBX is an architectural and aesthetically pleasing addition to any environment. Not only do we offer our SBX as a whole fixture; we also sell the recessed shroud to transform existing flat panels in your space! This specification grade luminaire is available in 1x4, 2x2, and 2x4 sizes with 3500, 4000, or 5000K Color Temperatures. Our 2x4 boasts an offering of two different Lumen packages. The shroud can be customized to add a pop of color.

Transform your flat panel into a specification grade luminaire with our Sky Box accessory. Custom interior color makes a statement and reinforces your brand.

Ordering Patterns

You can draw it, we can make it!

LITE Technology can create patterns with 23, 44, 45 and 66 Series. Patterns are available for recessed and pendant mounting versions with lit corners or unlit corners. See below for some of the possibilities and consult factories for exact ordering numbers and pricing.

Engineered ends either accept end cap to complete run or to join two fixtures together for continuous runs.

Continuous Run Ordering for 23, 44, 45, 66, LPLIN and SLP Series

1. Determine the run length and whether the run will be dimmed or not.
2. Use the above 2, 4 or 8 ft. runs from the Series Specified to add up to total run length. Use the largest individual fixtures to achieve run lengths (i.e. for 20 ft. run use 2x8 ft. individuals and 1x4 ft. individual from above with the correct ordering info for your series). Watts and lumens for each section should be proportional for the size (i.e. If 48W with 4 ft then 8 ft should be 96W). Consult for other lengths.
3. Designate each length required in the run whether it will be the **beginning of the run "B", joiner in the run "J" or the end "E" of the run. Add the letter designation to the end of the part number.**
4. For Plug and Play electrical wiring between individual fixtures in the run, add one of the following harnesses. The number of wires is based on whether the run will be dimmable, with emergency or just ON/OFF.

Add Wiring Harness Code After the Driver Designation

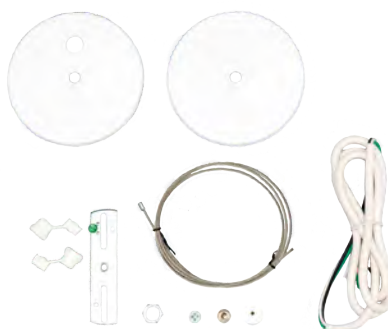

- PI1 - 3 Wire Harness (normally for non-dim applications)
- PI2 - 4 Wire Harness (normally for emergency circuit)
- PI3D - 5 Wire Harness (normally for 0-10V dimming)
- PI4D - 6 Wire Harness (normally for 0-10V dimming and emergency)

For continuous runs, first remove the end plates on the fixtures you want to join together; then using bolts and nuts (4X), attach the two ends together. Be sure both fixtures are properly aligned before tightening the bolts. Repeat steps for the overall length desired. Finish run, with the end plate attached to the last fixture in the run.

Individual or Continuous Use ~ Convenient and Simple to Install

Based on your feedback, our brand new All-In-One LED Linear Channels are now improved and easier than ever to: specify, order and install! This integral driver channel in two different profiles is great for an individual fixture (in 4 or 8 foot), and to join multiple channels for longer, continuous runs (in 4 or 8 foot multiples). This beautifully finished aluminum channel can be easily installed by any professional in just minutes. Even a "do-it-yourselfer" will appreciate that this fixture comes with step by step instructions. A specially designed integral wiring harness (ordered separately) makes joining two channels electronically simple and efficient. A unique, mechanical joiner bracket in conjunction with our special joiner tool allows for joining two or more channels together with no light leak and a clean connection.

This **ILB-CP10** from IOTA Engineering is a UL Classified LED emergency driver that allows the same LED fixture to be used for both normal and emergency operation. In the event of a power failure, the ILB-CP10 switches to the emergency mode and operates the existing fixture **90 minutes**. The unit contains a battery, charger and converter circuit in a single can and is available in different mounting configurations for individual fixture requirements. The ILB-CP10 maintains the output wattage even as the system voltage diminishes. Also suitable for field installation.

INPUT VOLTAGE: 120-277Vac±10%
OUTPUT CURRENT: 550-245mA
OUTPUT VOLTAGE: 20-54Vdc

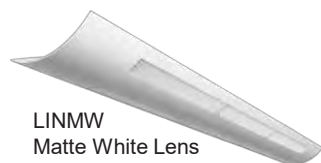

KT-EMRG-LED-12-1200-EN

Stairwell Lighting

FS-505 Mounted in Stairwell

Stairwells provide one of the easiest opportunities to provide energy savings. Reduce the light output when no one is in the stairwell and increase light when anyone enters the stairwell.

Ultrasonic technology for open area detection and line-of-sight obstructions.

Choose the percentage of light output (XX) that you want when space is unoccupied.

All-In-One Retrofit LED Troffer Kits

Convert an existing linear fluorescent fixture to a state-of-the-art Linear LED fixture in minutes with this LED All-In-One Retrofit Kit. Choose from two great styles of Linear LED fixtures that will not only increase lighting performance, save energy and reduce maintenance but provide a fresh new look for the space. The LED Center Basket All-In-One Retrofit provides the look of a popular direct/indirect linear fixture with a special designed reflector and LED lens to provide comfortable, abundant lighting. The Chicklet Retrofit Kit provides a luminous pillow styled lens and a high level of lighting with a dramatic appearance. Each kit mounts in minutes with all the LED components neatly engineered in one simple frame that mounts to two side rails that mount between the existing fixture body and the T-bar. Available in 2x2 or 2x4 sizes and a variety of wattage, lumens and color temperatures.

Install in Minutes:
Place Rails between fixture and T-Bar on each side. Then latch and secure All-In-One-LED-Retrofit into place.

Stairwell Lighting

FS-505 Mounted in Stairwell

Stairwells provide one of the easiest opportunities to provide energy savings. Reduce the light output when no one is in the stairwell and increase light when anyone enters the stairwell.

Ultrasonic technology for open area detection and line-of-sight obstructions.

Choose the percentage of light output (XX) that you want when space is unoccupied.

Savegreen INTRODUCING SAVEGREEN

QUIK LED Fixtures use Savegreen Lamps

T8 Bypass Type B Linear Lamps

Savegreen has a comprehensive assortment of LED T8 Bypass lamps so you can "customize" your X1LED fixture to your specifications.

X1LED fixtures come standard with the most popular 15 watt and 1740 Lumen single ended frosted glass tube with 5 year warranty.

What's Inside Your Fixture Matters

LED T8 LAMP WITH EXTERNAL BALLAST

Easiest Retrofit, But May Not Pay

LED T8 Lamps will improve the lighting from your fixture, but the ballast life of 3 to 5 years may reduce the benefit.

FLUORESCENT BALLAST & LAMP

Cost Effective without Performance and Energy Saving

Still a cost effective solution but doesn't have the performance, energy savings or maintenance of LED.

LED ARRAY & DRIVER

New Technology, But No Maintenance

On the surface the enhanced performance and life are great but not being able to adjust to your needs or "relamp" will be an unpleasant surprise.

SAVEGREEN INSIDE

Benefits of LED Plus the Maintenance and Flexibility

Great lighting, long life, easy maintenance and tons of flexibility make this the winner

Crisp, vivid lighting

Enhanced color

Extended lamp life over 50,000 hours

Energy efficient up to 40% savings

Flexible to change output during life of fixture

Flexible to change color over life of fixture

Flexible to change What's Inside with - out professional Installer

Don't discard and replace entire fixture when breaks down

Change What's Inside by yourself in less than a minute

STATEMENT OF LIMITED WARRANTY

A. LITE Technology warrants that all of its “legacy” Fluorescent or HID Product(s), other than ballasts, emergency battery packs, lamps and poles supplied in connection therewith, will be free from defects in workmanship and materials for a period of three (3) years from date of shipment (the “Warranty”). SUCH WARRANTY IS IN LIEU OF ANY OTHER WARRANTIES INCLUDING WITHOUT LIMITATION, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. LITE Technology, at its option, will repair or replace, F.O.B. our factory, freight prepaid, any LITE Technology Product(s), other than ballasts, emergency battery packs, lamps and poles supplied in connection therewith, which are deemed, in its sole and absolute discretion, defective in workmanship or materials. Such repair or replacement is the sole and exclusive remedy available to any customer to rectify defects in LITE Technology Product(s), other than defects in ballasts, emergency battery packs, lamps and poles sold in connection therewith. Ballasts, lamps and poles are covered by separate manufacturer or factory warranties, if applicable at the time of defect.

B. LITE Technology warrants that all of its indoor and outdoor light emitting diode (LED) fixtures, including the LED array, LED drivers and integral control devices, are free of defects in workmanship and materials for a period of five (5) years from the date of shipment. Unless otherwise expressly stated in writing, the LED array will be considered defective if a total of 15% or more of the individual light emitting diodes fail to illuminate. LITE Technology reserves the right to determine, in its sole and absolute discretion, whether to repair or replace defective LED fixtures or components. No charge-back, or reimbursement for in-the-field labor or material, or delay in installation, that results from defective products, will be honored, accepted or paid for by LITE Technology, unless expressly authorized in writing by LITE Technology. In no event shall any inside salesperson or outside sales agent of LITE Technology have the authority to bind LITE Technology to any such charge under this Warranty.

C. This Statement of Limited Warranty applies only when LITE Technology product(s) are installed in applications in which ambient temperatures are within the range of specified operating temperatures and are operated within the electrical values shown on the ballast or LED driver Label. LITE Technology will not be responsible for any failure of any LITE Technology product(s) that results from external causes such as: acts of nature; physical damage; exposure to adverse or hazardous chemical or other substances; use of reactive cleaning agents and/or harsh chemicals to clean LITE Technology product(s); environmental conditions; vandalism; fire; power failure, improper power supply, power surges or dips, and/or excessive switching; induced vibration; animal or insect activity; fault or negligence of purchaser, any end user of LITE Technology product(s) and/or any third party not engaged by LITE Technology; improper or unauthorized use, installation, handling, storage, alteration, maintenance or service, including failure to abide by any product classifications or certifications, or failure to comply with any applicable standards, codes, recommendations, product specification sheets, or instructions of LITE Technology; use of LITE Technology product(s) with products, processes or materials supplied by any end user or third party; or any other occurrences beyond LITE Technology reasonable control. LITE Technology also will not be responsible for any substantial deterioration in fixture paint finish that is caused by failure to clean, inspect, handle or maintain.

D. Ballasts, emergency battery packs, lamps and poles are covered by separate manufacturer’s warranties. Therefore, each LITE Technology customer or end-user must timely notify LITE Technology or the manufacturer directly, if directed to do so by LITE Technology in order to preserve the applicable manufacturer’s warranty available under this provision. CUSTOMER OR END-USER FAILURE TO TIMELY COMPLY WITH THIS NOTICE PROVISION MAY VOID THE MANUFACTURER WARRANTY.

E. IN NO EVENT SHALL LITE TECHNOLOGY BE RESPONSIBLE TO REPAIR OR REPLACE ANY PRODUCT THAT WAS NOT USED FOR ITS INTENDED PURPOSE OR THAT WERE INSTALLED OR MODIFIED IN ANYWAY NOT IN ACCORDANCE TO LITE TECHNOLOGY EXPRESS WRITTEN INSTRUCTION.

F. No agent, employee or representative of LITE Technology has any authority to bind LITE Technology to any affirmation, representation or warranty concerning Products sold by Texas Fluorescents unless authorized to do so in writing.

We reserve the right to change design, materials, LED’s and finish in any way that will not alter installed appearance or reduce function and performance.
