

HSL - HBC Retrofit (RK) LED Series

Upgrades Made Easy!

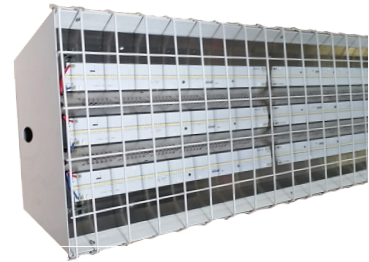

Now upgrade your existing body!

New LED Technology offers more energy savings and longer life

High Efficiency High Bay Solutions

Engineered for premium performance using the highest design process for balanced performance from LED Boards and Drivers. Applications are perfect for: Warehouses, Manufacturing plants, Sports facilities and Retail spaces. Interior Materials/Reflector Mounting Plate are design bent to suit fixture body allowing for maximum light output. Custom Reflector Material, Matt Finish cuts glare and .040 thick Aluminum provides for heat sink. Additional materials are fully perforated to create air flow and assist keeping components cool during operation.
