

Series: HLSAR Micro Linear Strip Compact High Lumen Strip

HSL SAR FR Series Sleek Low Profile Lensed Strip

FIXTURE DESCRIPTION:

Architecturally forward design! This Low Profile Micro Designed Strip Fixture, is sleek and contemporary and will work well in any environment. Multiple lengths and flexibility to run in continuous rows allows this fixture to be a perfect fit for : Schools, Offices, Conference Rooms, Designer Studios, Retail, or Hospitals. This fixture would also work well for any open concept area.

Hang individually with hanging cables, pendant mount or even ceiling mount. For continuous run applications see Wire Harness chart for plug and play harness options.

HOUSING

Die-formed and welded 22-gauge cold rolled steel body with knockouts on ends allowing continuous row mounting. A 1/2" regressed flange at the bottom ensures uniformity and rigidity. Design housing with formed LED gear-tray allows for uniform light and great distribution, putting light right where you need it.

DIFFUSERS

Both 4' & 8' Fixtures include a specially formulated frosted acrylic profile lens that provides high light transmission excellent glare control.

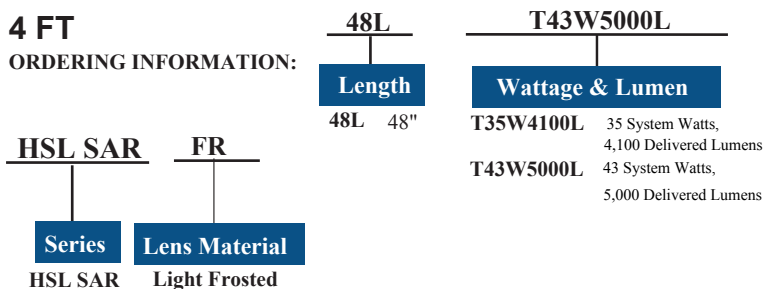

Sleek Low Profile Lensed Strip: 4', 8' and continuous rows
